

Topic: **The Intelligent Design of the World**

The Outer Way

With a quick glance at the world, we realize that **the world is not in disorder**. Rather, all phenomena are in motion **moving towards a clear and determined direction**.

Note 1

In order to come into being and remain alive, a set of conditions need to be provided for any living creature. Now choosing these conditions and preliminaries requires **intellect and knowledge**.

Note 2

Every creature has a special effect which is exclusive to it and its particularities do not separate from them.

Note 3

All of the organs of living creatures are coordinated with each other. This relationship and cooperation is another sign of the order in the universe.

Note 4

Looking at the world makes it clear that not only are all organs of one body of one living creature in co-ordination but **also all creatures are in coordination** with each other. **This shows the existence of one clear system**.

The Relationship of Order and Intellect

This truth is clear for everyone's conscience that **whenever order exists in a facility, this shows intellect, thought, a plan and a goal**.

✚ Through the mentioned points we come to the conclusion that there is a creator, who created them in Order and has Power over them.

✚ **The larger the system the greater the intellect** and knowledge behind it.

Examples of Order, Goal and Design in the World

1. The center of administration of the country of your body; **brain**
