

A BELIEF IN THE RESURRECTION IS IN OUR INNATE NATURE

1. Love of Survival in All Human Beings

We believe that whatever He created in our bodies is based on a known measure and because of this, the love and **desire of a human being for survival must also have an accounting** and that can be nothing other than the existence of a world after this one.

2. Resurrection among the Tribes of the Past

As the love a mother has toward her child is due to her nature and does not change over time or place, scholars say that careful study has shown that **all people in the past, even the earliest of them had a kind of religious belief.**

3. Free Will

The human being has a basic difference with all other creatures of the universe and that is having **free choice and will in order to develop by their own deeds.**

There must be a Day of Judgment so that everyone would be judged by their deeds, otherwise giving free will would be pointless.

4. Resurrection and Justice

Without a Day of Judgment, reward and punishment, the principle of the God's justice would vanish.
