

L 9

Topic: **Mufrad word**

A review

Mufrad word has four sub-divisions:

- 1) The word which has no parts; such as the interrogative particle.
- 2) The word which has a part but its parts do not indicate parts of the meaning.
Such as *Zaid* which has four letters but they do not signify his parts of the body.
- 3) The parts of the word signify parts of meaning but not the intended meaning.
Like when *Abdallah is a name of a person* (the intended meaning), although *abd*(a servant) and Allah have their own meaning but they are not parts of his body.
- 4) The word has parts which signify parts of the intended meaning but the signification is not intended.

Like when *rational being is a name*. Rationality and existence are in that person but this name signifies the person only.
