

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Lesson 76
The Five Universals (6)
(الكليات الخمس)

- Species (النوع) can be divided into:
 1. Actual species (النوع الحقيقي): The whole common reality of some particulars which are different only in number, in the answer to "What is it?", such as "انسان".
 2. Relative species (النوع الاضافي) : The universal "كلى" which has another genus "جنس" above is called relative species "النوع الاضافي" as well, because it is "نوع" for that higher "جنس". Such as "حيوان" (in relation) to the growing substance (الجسم النامي).
