## Lesson 86

### Predication by Nature and Designation

(الحمل الطبيعي و الحمل الوضعي)

- Why do we say 'predicated universal' (ذاتي المحمول)? Because these universals are answers to some questions and the answer is sometimes species, genus and differentia, etc. There is a subject and predicate in the answers.
- 
- Two important points in the predication:
  1. To be able to predicate something (محمول) on another thing (موضوع), there should be a sort of unity.
  2. There should be some sort of difference between subject and predicate

- Predication can be of two types:
  1. The primary essential predication (ذاتي اولي)
  2. Common and technical (شايع صناعي)
