بِسْمِ ٱللَّهِ ٱلرَّحْمَٰنِ ٱلرَّحِيمِ

Lesson 87
Primary Essential and Common Technical Predication
(الحمل الاولى الذاتى و الشايع الصناعى)

- The complete definition ''الحد التام'' gets predicated on 'نوع' and 'جنس' such as in ''الانسان حيوان ناطق'' while it is not 'نوع' or 'جنس' or 'فصل' for it; so, is there any other mediator between 'ذاتى' and 'عرضى'?
  Answer: The predicate that is meant in the five universals is common and technical(حمل شايع صناعى) .

- The primary essential predication (حمل ذاتى اولى): If the unity between the subject and the predicate is in concept, the difference must be contractual, such as ''الانسان حيوان ناطق''; in which the difference between 'انسان' and 'حيوان ناطق' is in conciseness. This type of predication is 'الحمل الذاتى الاولى'.

- Common and technical (الحمل الشايع الصناعى): If the unity of subject and predicate is in their instances in reality, and the difference is in concept. It is because the subject is one of the instances of the predicate; this predication is ''الحمل الشايع الصناعى''. such as ''الانسان ناطق''.
