- When we hear a word, and we want to know it, we must go through five stages:
 1. Asking the literal definition (التعريف اللفظي)
 2. Asking its nature (التعريف الاسمي)
 3. Asking whether it exists (التعريف الحقيقي)
 4. Asking about the existence of some feature in an existent thing.
 5. Asking the reason for the predication or for that and the existence together.
- The questions mentioned above are the main general questions regarding knowing things, but other questions about quality, time, space, etc., are details in comparison to the main ones and can be asked by 'هل المركبة'.
