

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Lesson 104
The Types of Definition (3)
(اقسام التعريف)

- Complete identification 'الرسم التام' is to define something by the proximate genus and the property (خاصة) which contains both the 'ذاتي' and 'عرضي' of the subject and therefore, it is called 'تام' (complete); such as 'الحيوان الضاحك' for 'انسان'.
- Incomplete identification 'الرسم الناقص' is to define by only the 'خاصة' (property), such as 'ضاحك' alone for 'انسان', so it contains only the 'عرضي' and therefore, it is called 'ناقص' (incomplete).
- The two types of 'رسم' only can distinguish the subject from the other species accidentally. They are not equal to the subject in concept but in instances, and their signification is 'الدلالة الالتزامية'.
