'حدّ' or 'رسم' can be acquired through two ways:

1. Intellectual analysis
2. Logical binary division

The intellectual analysis consists of five steps:

1. Paying attention to the unknown
2. Distinguishing its species and genus
3. Moving from the unknown to the known concepts in mind
4. Moving around in the knowns, distinguishing the essential or accidental peculiarities of the unknown; here, the 'الحدّ التامّ' or 'الرسم التامّ' gets acquired.
5. Moving back from the known to the unknown.
